Submit a letter to the editor or write to letters@theatlantic.com.Q: Redirecting from Tumblr Tumblr API Basically I'm trying to redirect from a page located at tumblr.com/ to my domain using the following header in my code: location / { add\_header X-Frame-Options SAMEORIGIN; add\_header X-Content-Type-Options nosniff; add\_header X-Xss-Protection "1; mode=block"; add\_header X-Robots-Tag none; add\_header X-Download-Options noopen; add\_header X-Permitted-Cross-Domain-Policies none; expires 86400; add\_header Cache-Control "max-age=172800, public, must-revalidate"; set \$substitute ""; index index.php; include /etc/nginx/vhosts/\$substitute/html/header.html; } I feel like this part of my code is the problem, it's never redirected, even if I only use the add\_header lines or if I remove them. It does however show on the page it's redirecting to (this is expected), but it just loads without any CSS or anything showing, which makes me believe something is wrong with the header code. Here's the HTML I have that is included, I wasn't able to tell anything from viewing Tumblr's HTML: Home
